Can I view the proposed map for the Newport Air Park overlay zone on line and present draft ordinances? The planes / air operations is already are an annoyance, especially in summer months private piolet, parasailing and military copter operations, at our home located on the corner of 29 Phillips & at 1 Jean Street in Marshall Village. I view Air Park operations encroachment on the surrounding community as unacceptable & unnecessary. Air Park operations must be rolled back inside the Air Park boundaries. OBTW The Westerly Zoning in 2018 haven't worked out all that well based on last weeks RI GA Senate Hearings for this years RIAC attempted Eminent Domain via RI DOT surrogate scam. Westerly Town council resolution opposes RIAC Bills 7-0. Attorneys spoke for abutting property owners association & individuals. So we are modeling an effort after Westerly attempting to accommodate RIAC in a defacto and unnecessary expansion of operations! Encroachment on private property and projection into the town? Something is terribly wrong with this confluence of events. Small airports servicing private aviation are money losers nation wide. Expanding this thig servicing weekend military, the almost rich and famous & hobbyist a the expense of the community is misplaced sanity. This is not about safety it is about the smell and come of intoxicated Federal grants and monies as made clear at last weeks RI GA Senate public input judiciary hearings for RIAC Bills. Middleton must not become an unknowing coconspirator in advancing this scam.
