**RE: Permit Modification
WQC/STW File No. 18-214; RIPDES RIR101842
Washville Car Wash
991 & 995 West Main Road
Middletown, Rhode Island
Assessor's Plat 106, Lots 115 & 116**

Dear Mr. Carlucci:

The Rhode Island Department of Environmental Management Office of Water Resources (RIDEM OWR) has reviewed the above-referenced project for compliance with the RIDEM Stormwater Management, Design and Installation Rules (Stormwater Rules: 250-RICR-150-10-8) and the Rhode Island Pollutant Discharge Elimination System Construction General Permit (CGP). The proposed project will have a Washville branded car wash with associated vacuum stalls. This site will be serviced by public water and sewer. The BMPs will consist of two Contech Cascade pretreatment systems and a lined subsurface sand filter system.

The project is as further describe in your application and detailed on the site plans stamped by Timothy Kratz P.E., as prepared by Sevan Engineering, received by RIDEM OWR on 8/30/2022.

This letter serves as your permit for the above-referenced project, provided that you comply with the application materials, the Stormwater Rules, and the following conditions:

- 1) You must submit the Notice of Start of Construction Form prior to commencement of any permitted site alterations or construction activity. The Start of Construction Form can be found on the Stormwater Construction Permitting website.
- 2) Prior to construction, you must erect or post a sign resistant to the weather and at least twelve (12) inches wide and eighteen (18) inches long, which identifies the initials "DEM" and the application number(s) assigned to this permit. The sign must be posted in a conspicuous location near the site access and maintained until the project is complete.
- 3) A copy of this permit and any inspection records must be kept at the site at all times until the project is complete. Copies of this permit must be made available for review by any RIDEM or City Town representative upon request. Electronic versions of required documents that are readily accessible from the construction site are acceptable.
- 4) All fill material shall be clean and free of matter that could cause pollution of the waters of the State.
- 5) The stormwater collection and treatment system approved herein is for the discharge of stormwater only. Any other discharge is prohibited.

- 6) Any alterations, additions or modifications to the stormwater system from that approved herein, including permanent closure must be reviewed and approved by the RIDEM OWR prior to being implemented.
- 7) You must notify RIDEM OWR upon completion of the project and final site stabilization.
- 8) You are responsible for the long-term inspection, cleaning and maintenance of the stormwater collection and treatment system to ensure proper performance of all components until documentation is provided to indicate that this responsibility has been assumed by another entity. Long-term operation and maintenance as described in the "Operation and Maintenance Plan prepared for Proposed Washville Car Wash 991-995 W. Main Road Middletown, RI 02842 dated June 30, 2022" prepared by Sevan Engineering.
- 9) The Cascade separators must be designed to have grate inlets to accept the stormwater drainage.

RIDEM's Rules and Regulations Governing the Establishment of Various Fees require that RIPDES CGP permit holders pay an Annual Fee of \$100.00. An invoice will be sent to the owner on record in May/June of each year if the construction was still active as of December 31st of the previous year. The owner will be responsible for the Annual Fee until the construction activity has been completed, the site has been properly stabilized, and a completed Notice of Termination (NOT) has been received.

This permit has the full force and effect of a permit issued by the Director. This permit does not relieve your obligation to obtain any other applicable local, state and federal permits prior to commencing construction and does not relieve you of any duties owed to adjacent landowners with respect to changes in drainage. RIDEM assumes no responsibilities for damages resulting from faulty design or construction.

If you have any questions regarding the contents of the permit, you may contact Joseph Camara at joseph.camara@dem.ri.gov or (401) 222-4700, extension 2777640.

Sincerely,

Nicholas A. Pisani, P.E.
Environmental Engineer IV
Rhode Island Department of Environmental Management
Office of Water Resources - Stormwater Engineering and 401 Permitting
